

Eurovision

Trends

from 2016 to 2022

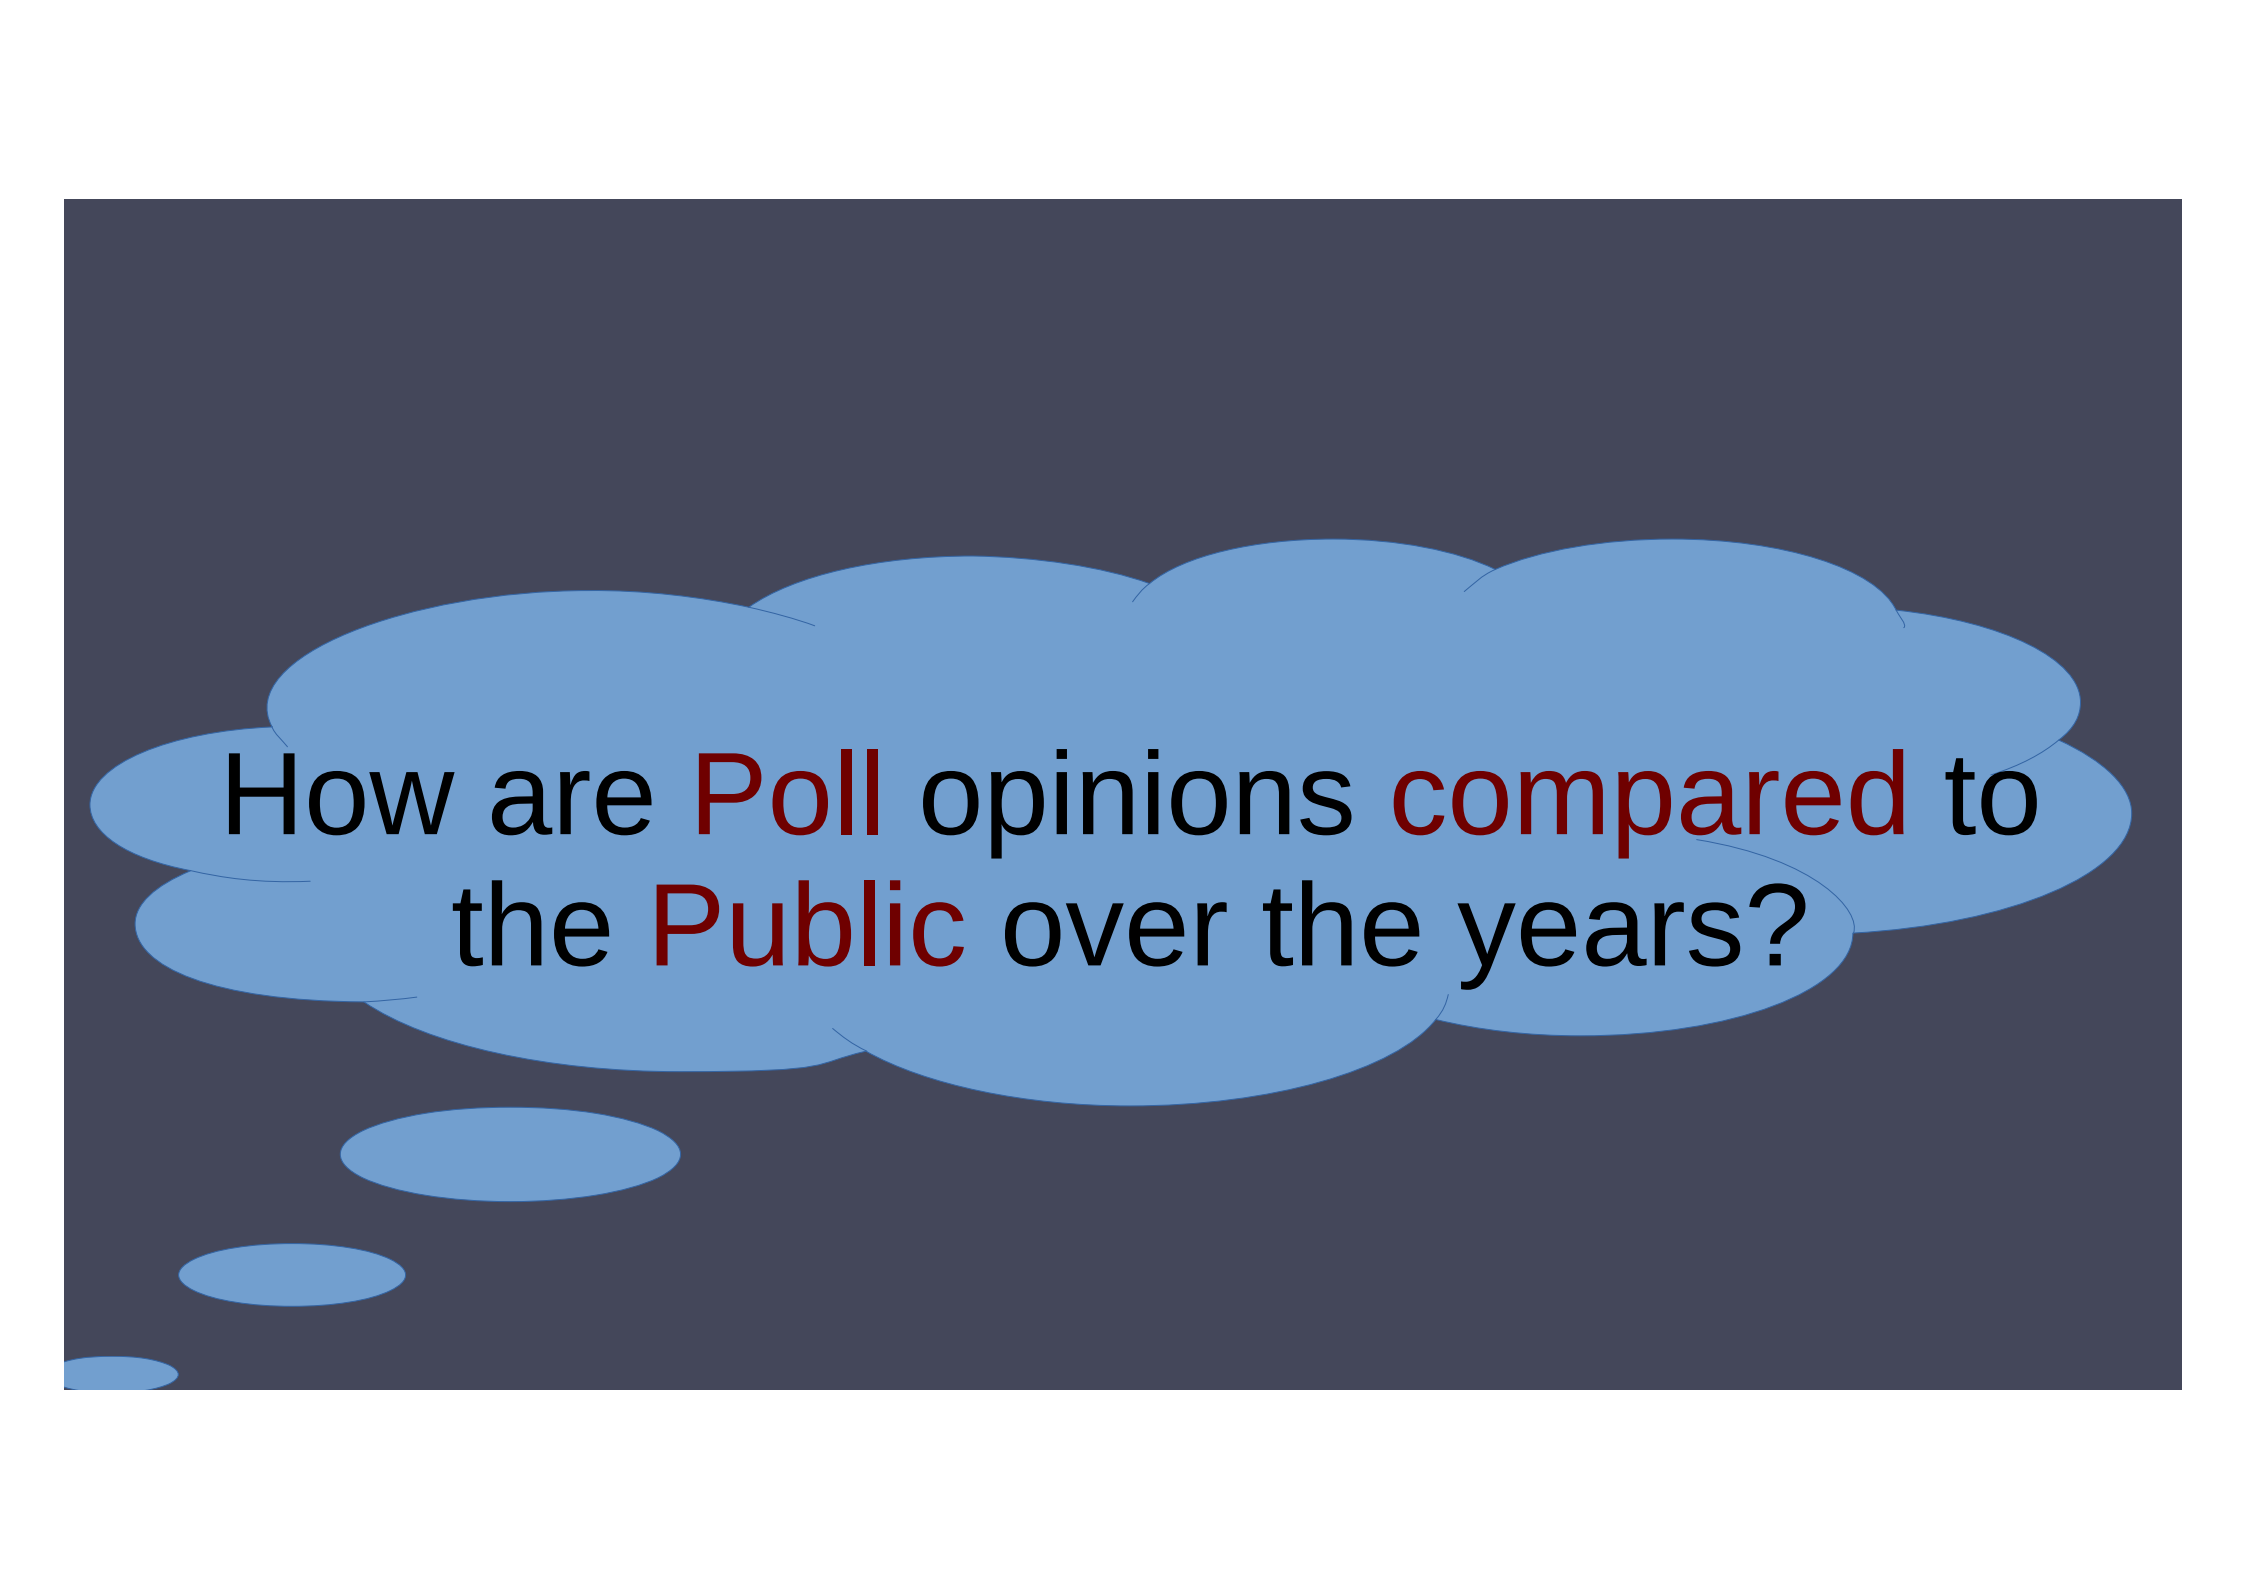

About the Project

Topics:

- Eurovision **Poll, Public / Tele-vote** and **Jury** Results comparison

Sites:

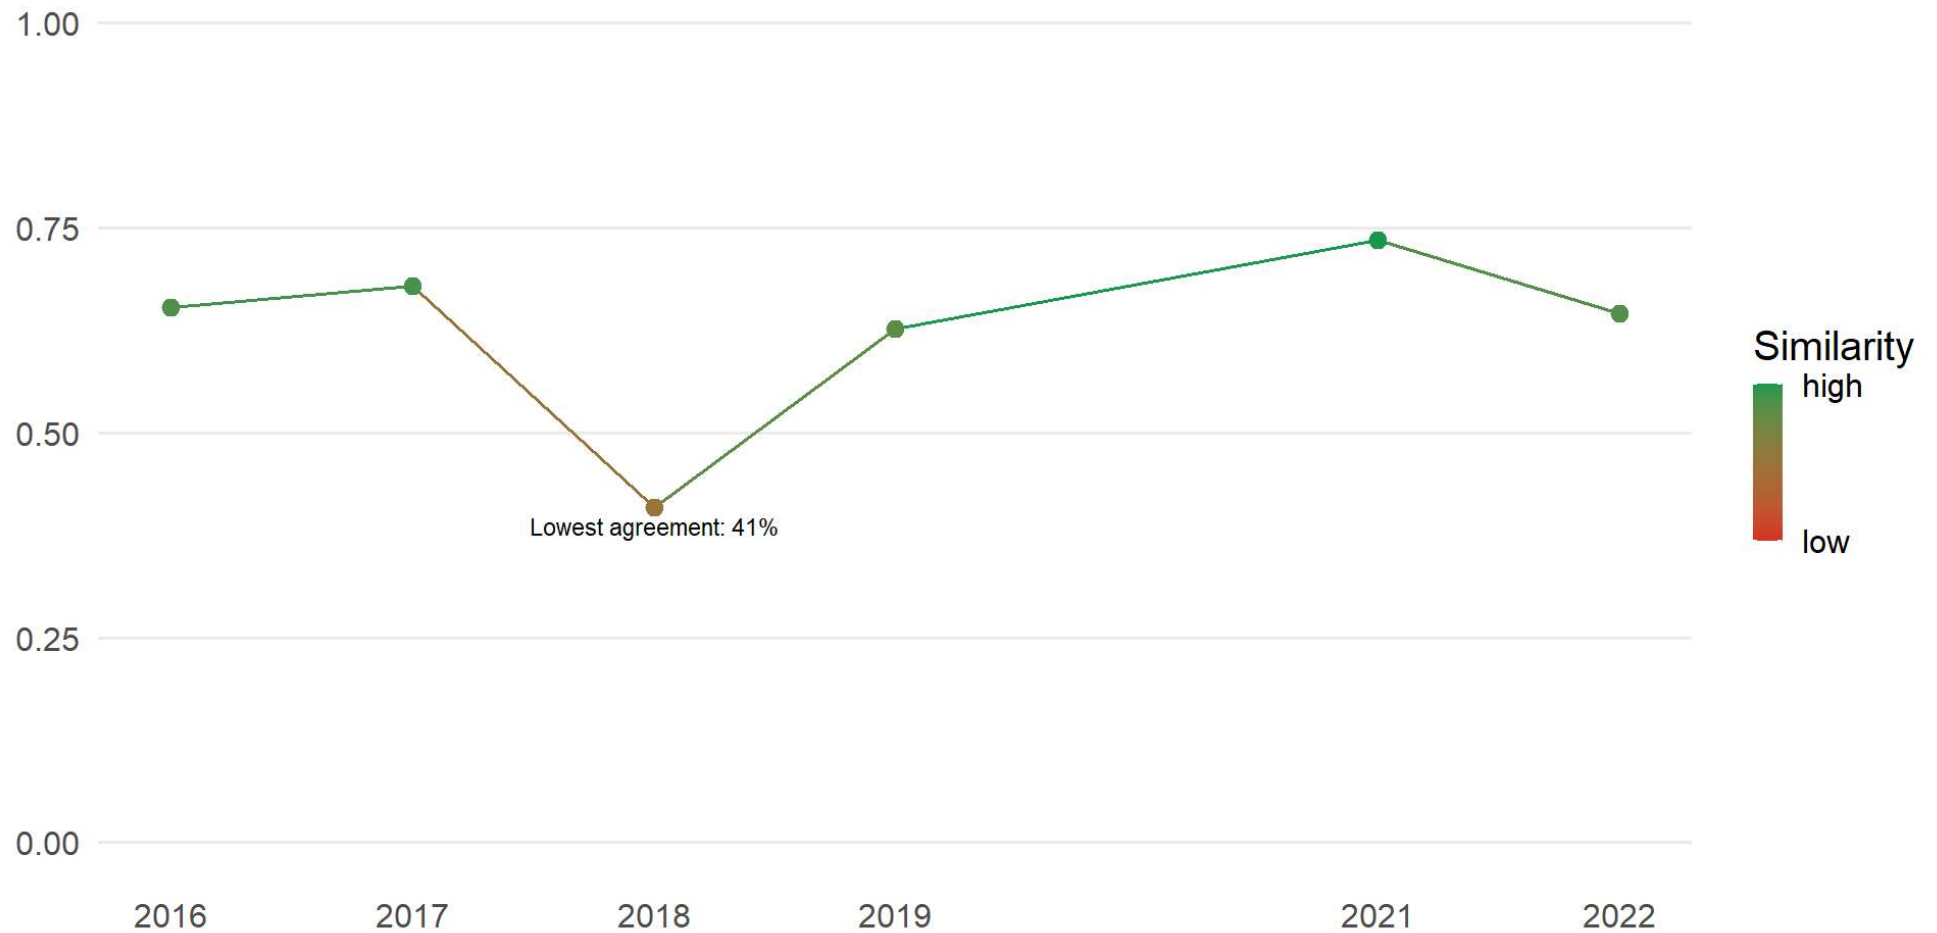

- Collection of Jury and Populace Voting (**Eschome**)
- Collection of Populace Polling (**Kaggle**)

How are **Poll** opinions **compared** to
the **Public** over the years?

Poll vs Televote Similarity by Year (2016–2022)

Each point shows the similarity between poll predictions and televote results with **Green = high similarity** and **red = low similarity**

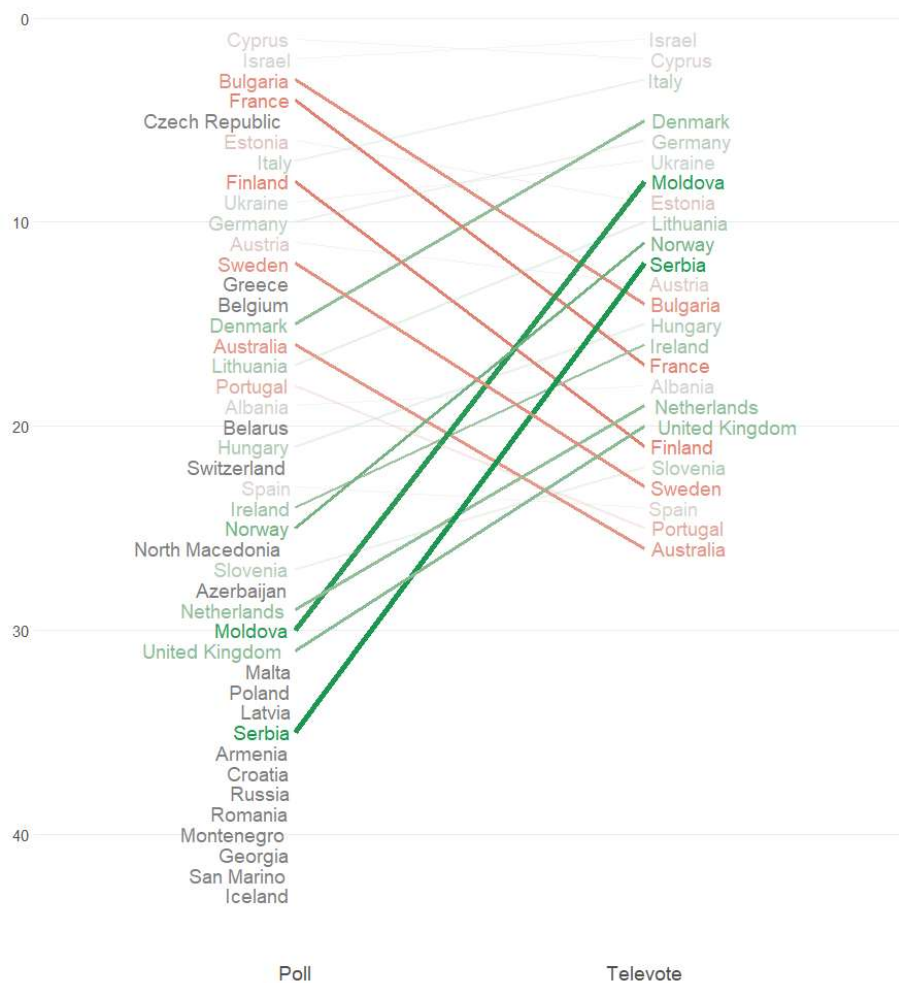

#	Data Attributes	Attributes Types	Visual Channel
1	Current correlation	Quantitative	Point colour gradient: green = high red = low
2	Next year correlation	Quantitative	Line colour gradient
3	Year	Ordinal	X-axis
4	Similarity	Quantitative	Y-axis
5	Lowest agreement	Categorical	Text annotation

How did country **rankings** change from Poll → Public results in the year with the least similarity?
How did **jury rankings** further influence the **final outcomes**?

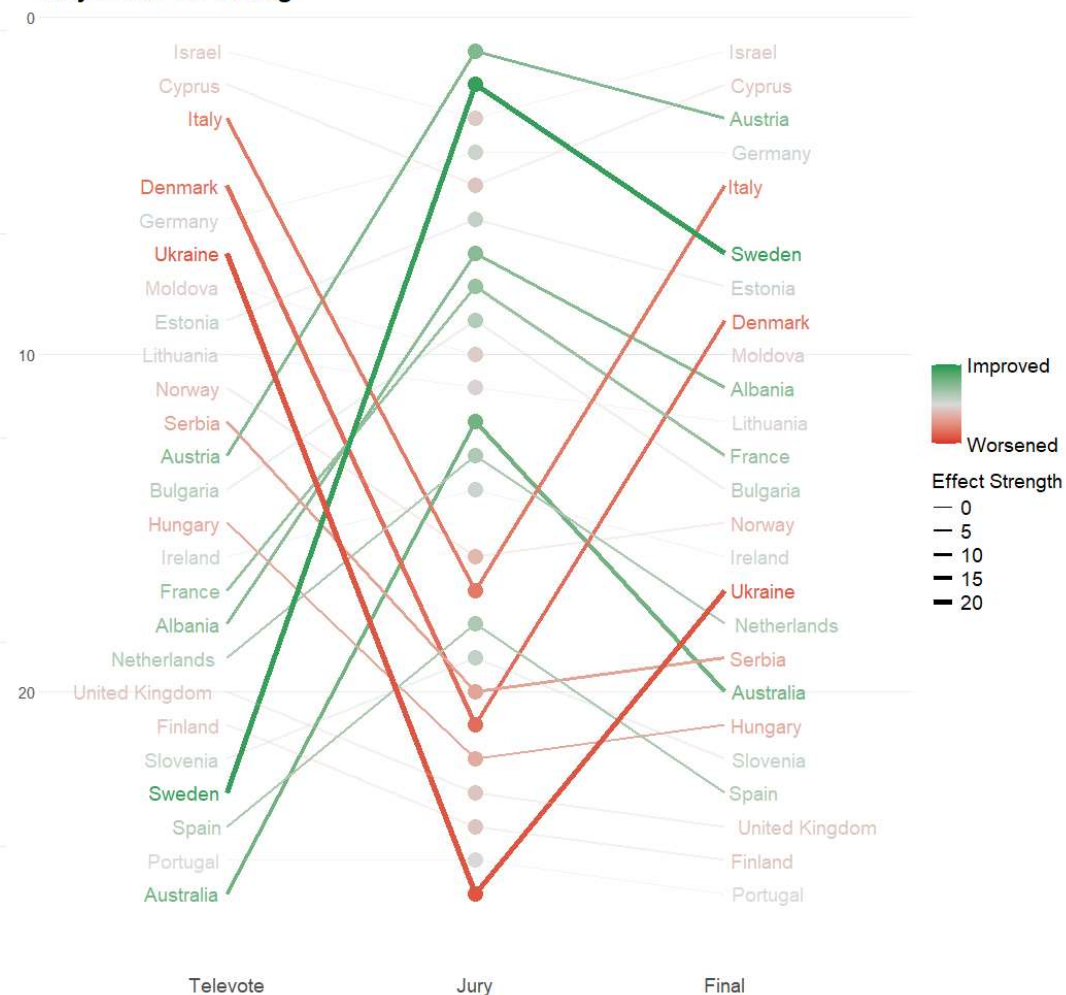

How Rankings Shifted:

Line color shows effect magnitude and direction (**green = improvement**, **red = worsening**).

Public Setiment Shift

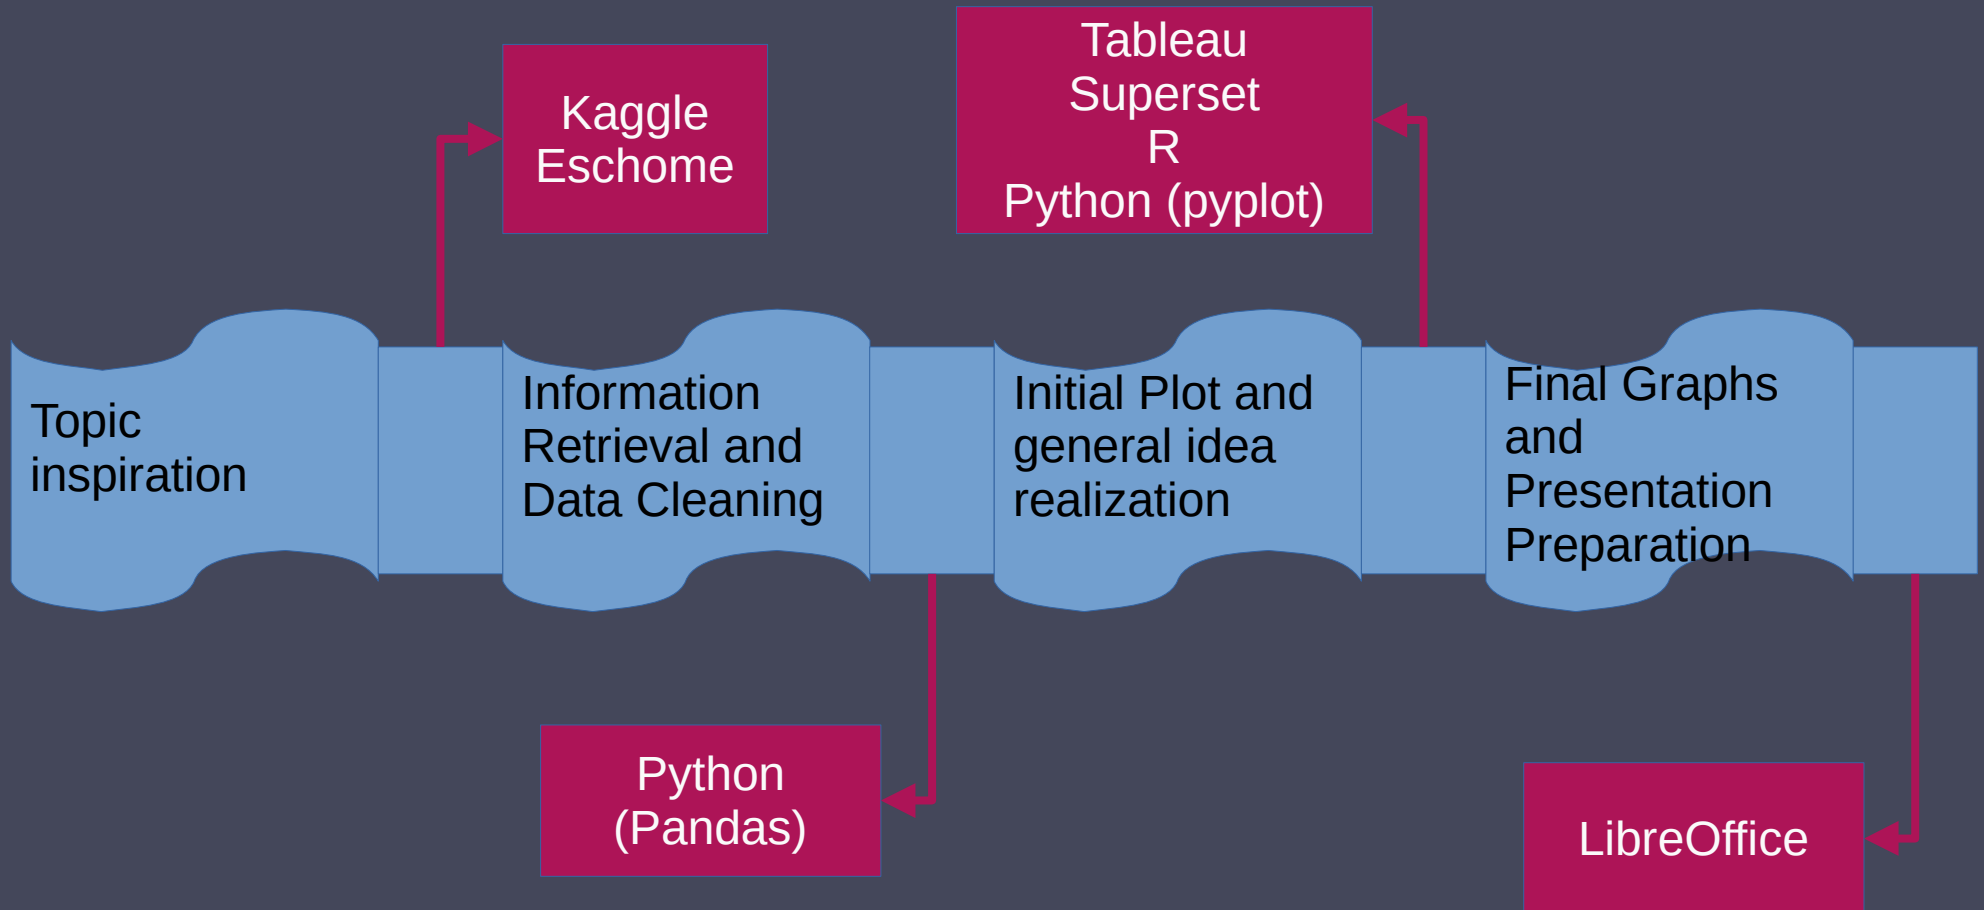

Jury Effect On Voting

#	Data Attributes	Attributes Types	Visual Channel
1	Stage	Ordinal	X-axis
2	Rank	Ordinal	Y-axis (reversed)
3	Effect magnitude	Quantitative	Line width
4	Effect direction	Quantitative	Line colour gradient
5	Category (improved/worsened/neutral)	Categorical	Line alpha (opacity)
6	Country	Categorical	Line grouping & labels
